

# The Prewriting Worksheets Series

## The Square (Part Two)

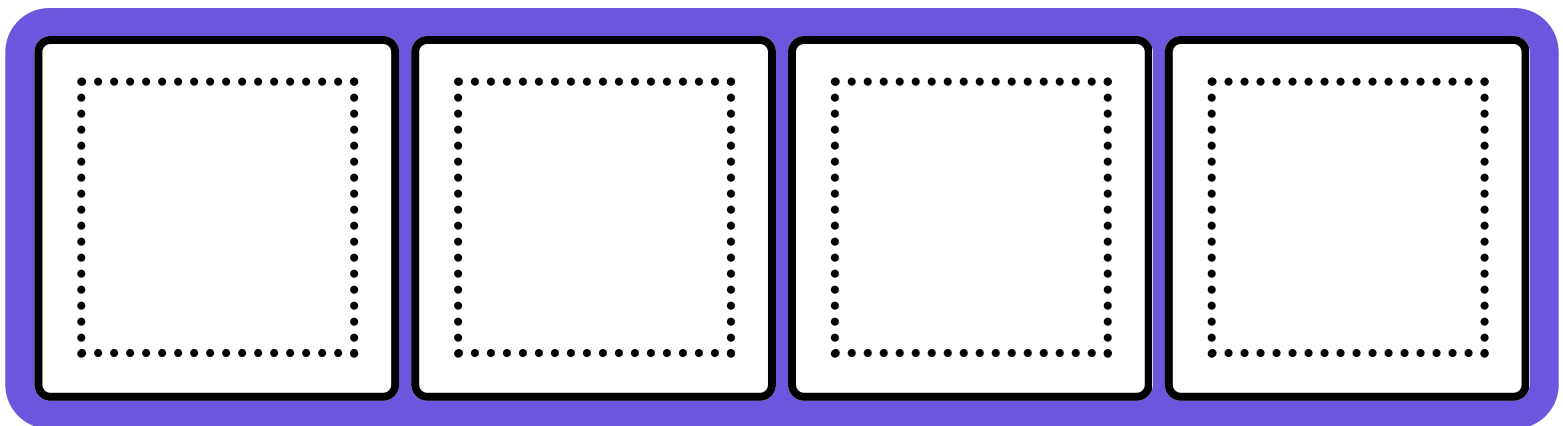

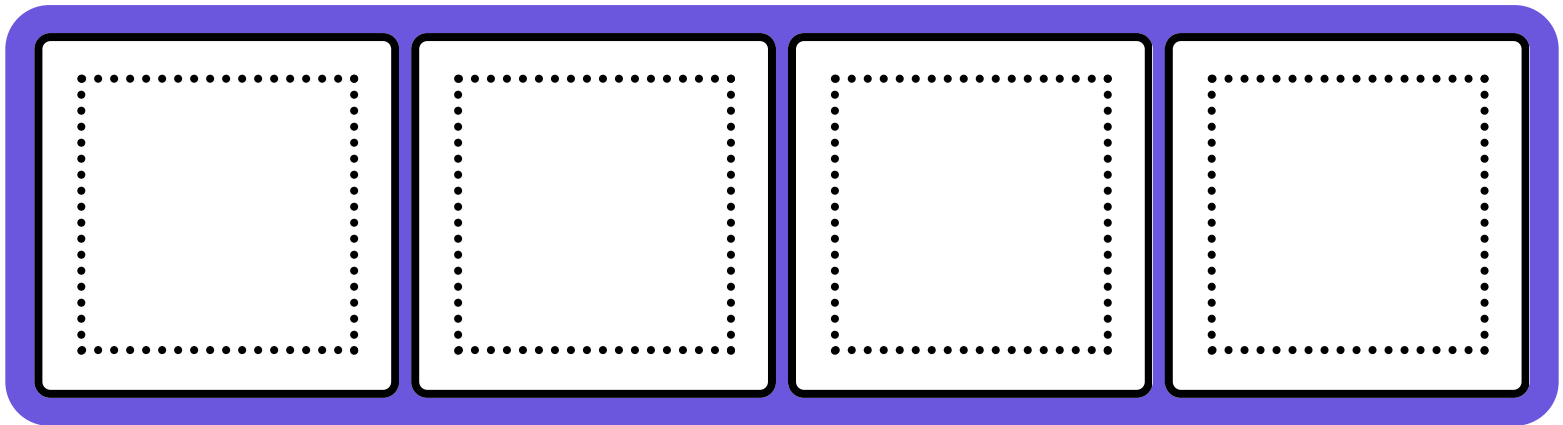

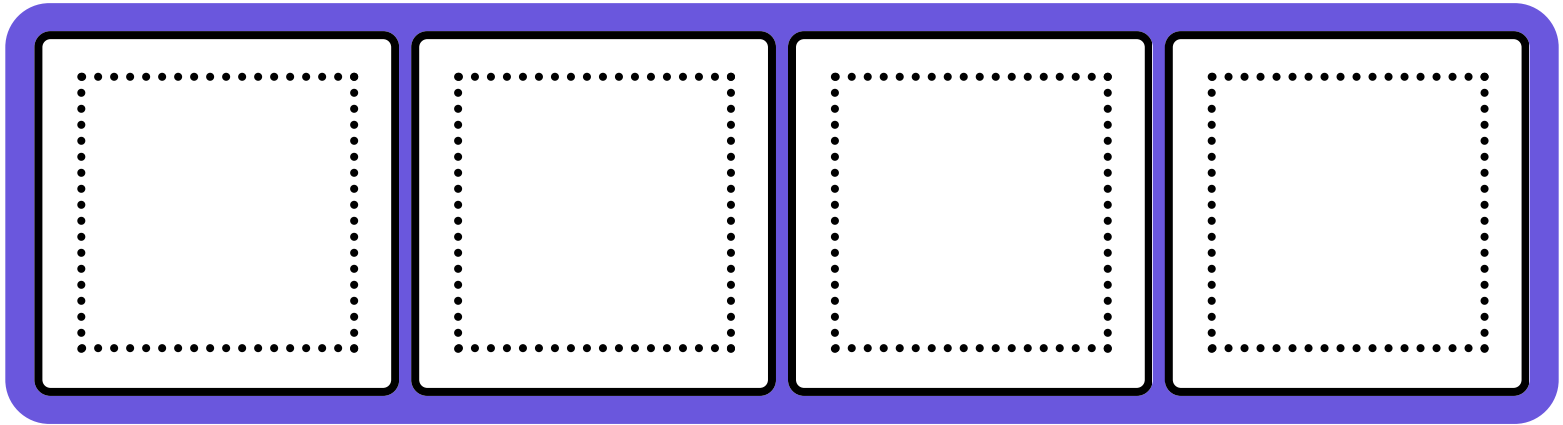

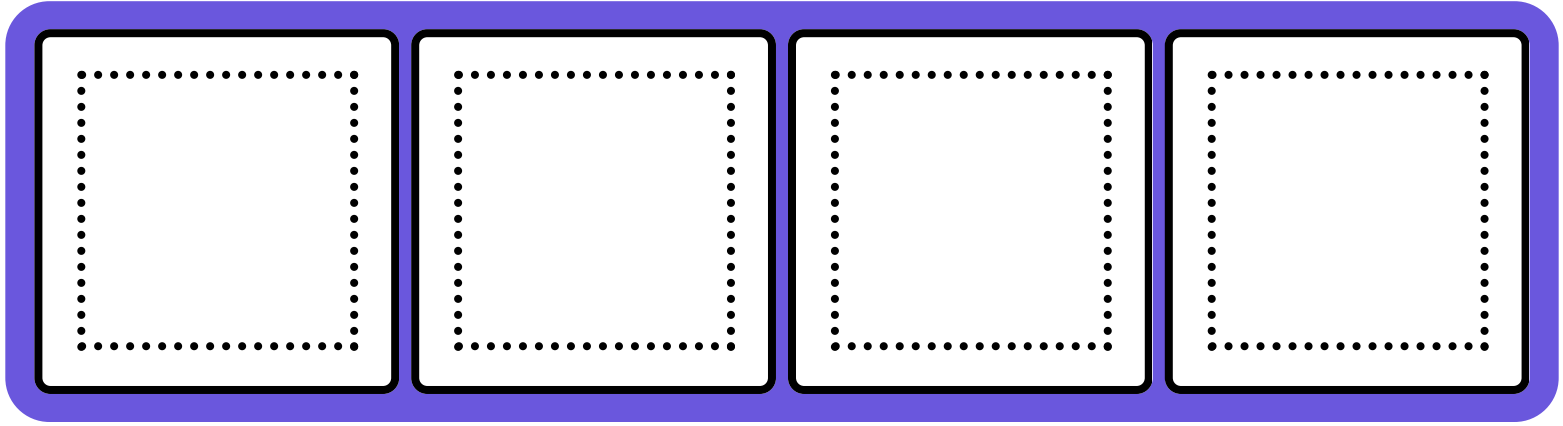

Fantastic work! You can now trace a square! Let's do a little more practice with this shape!

Let's trace the squares below! Trace your first line: start at the top left side and go down. Trace your second line: start at the top left side and go right. Trace your third line: start at the top right side and go down. Finally, trace your fourth line: start at the bottom right and go left.

Nice! Keep up the good work!

Chef Orlando needs to find his boxes so he can fill them with pizzas!  
Will you help him find them all? Trace the squares below.

Now let's draw our squares! Do exactly what you did when you traced them!

Draw a line from the top left dot down to the bottom left dot. Then start at the top left dot again and go to the top right dot. Next, draw a line down to the bottom right dot. Finally, draw a line over to the bottom left dot.
