

The Prewriting Worksheets Series

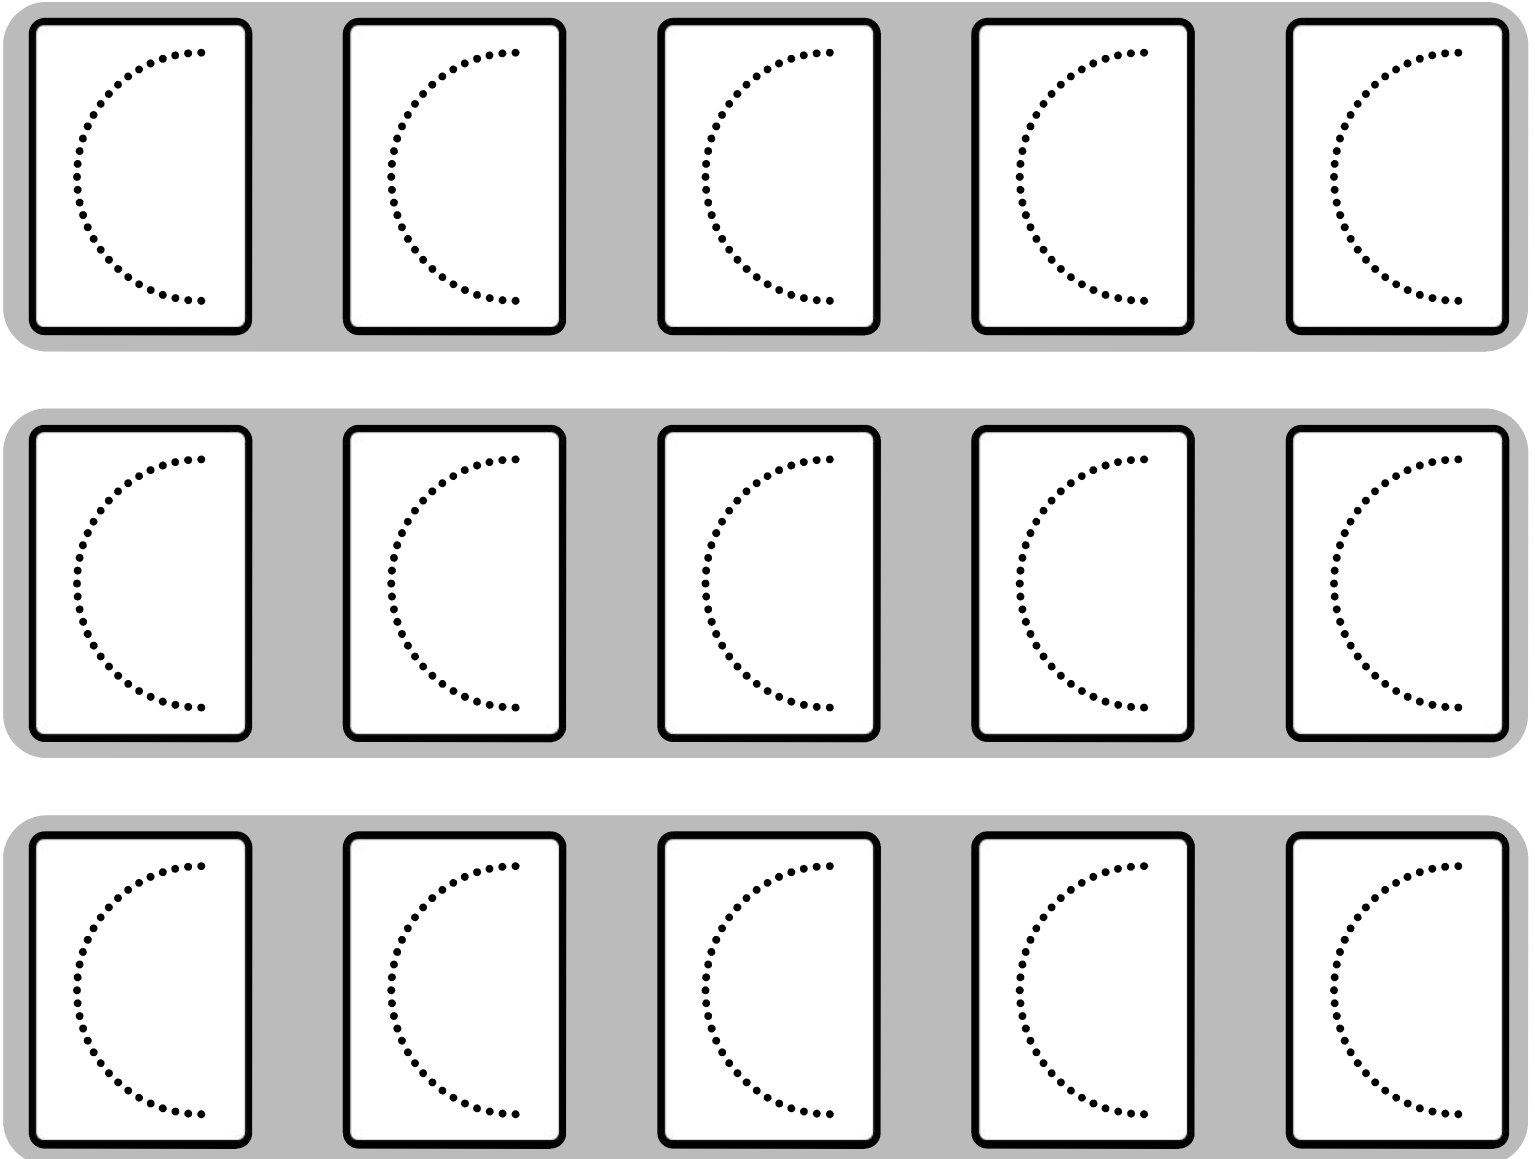

Curved Lines (Part One)

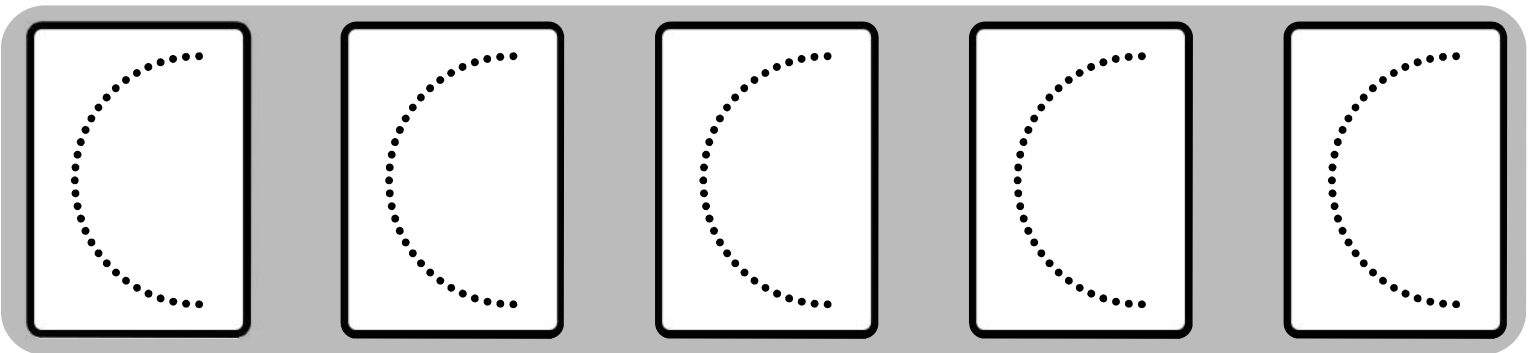

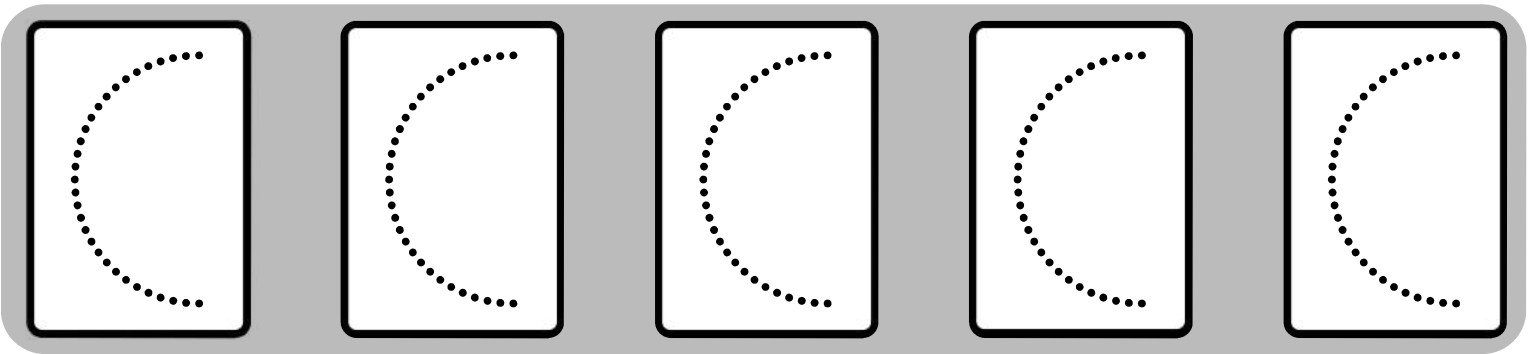

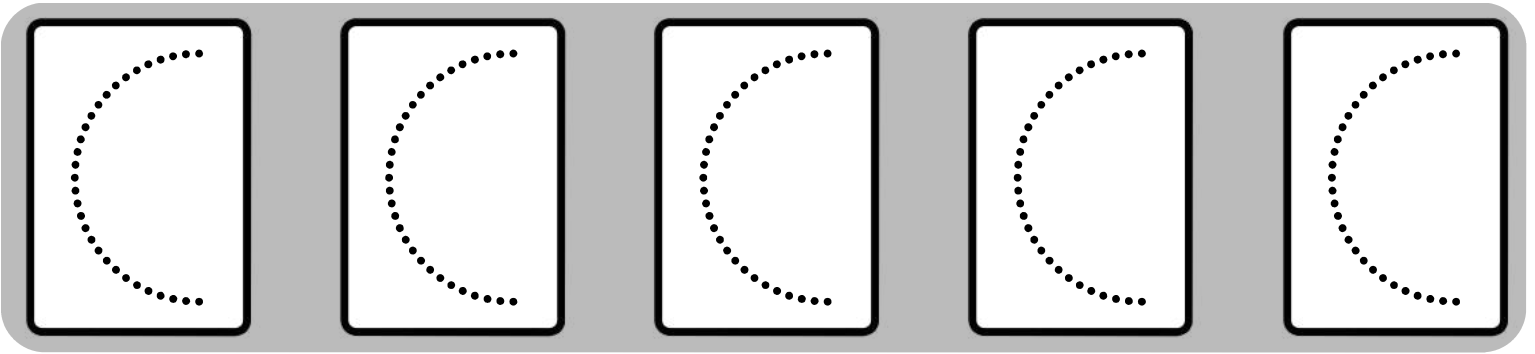

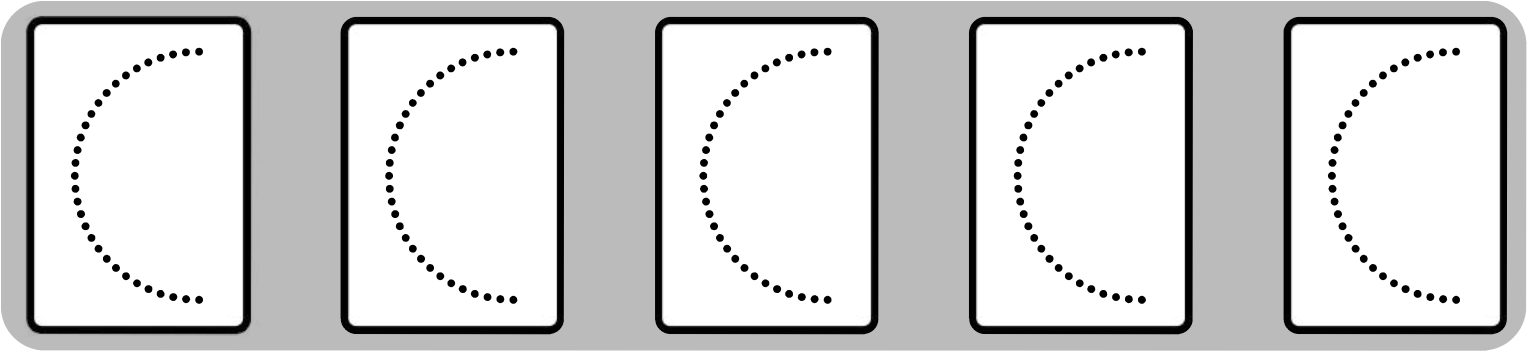

We've learned how to make many different kinds of straight lines. Now let's learn how to make curved lines! Can you make this shape with your hand?

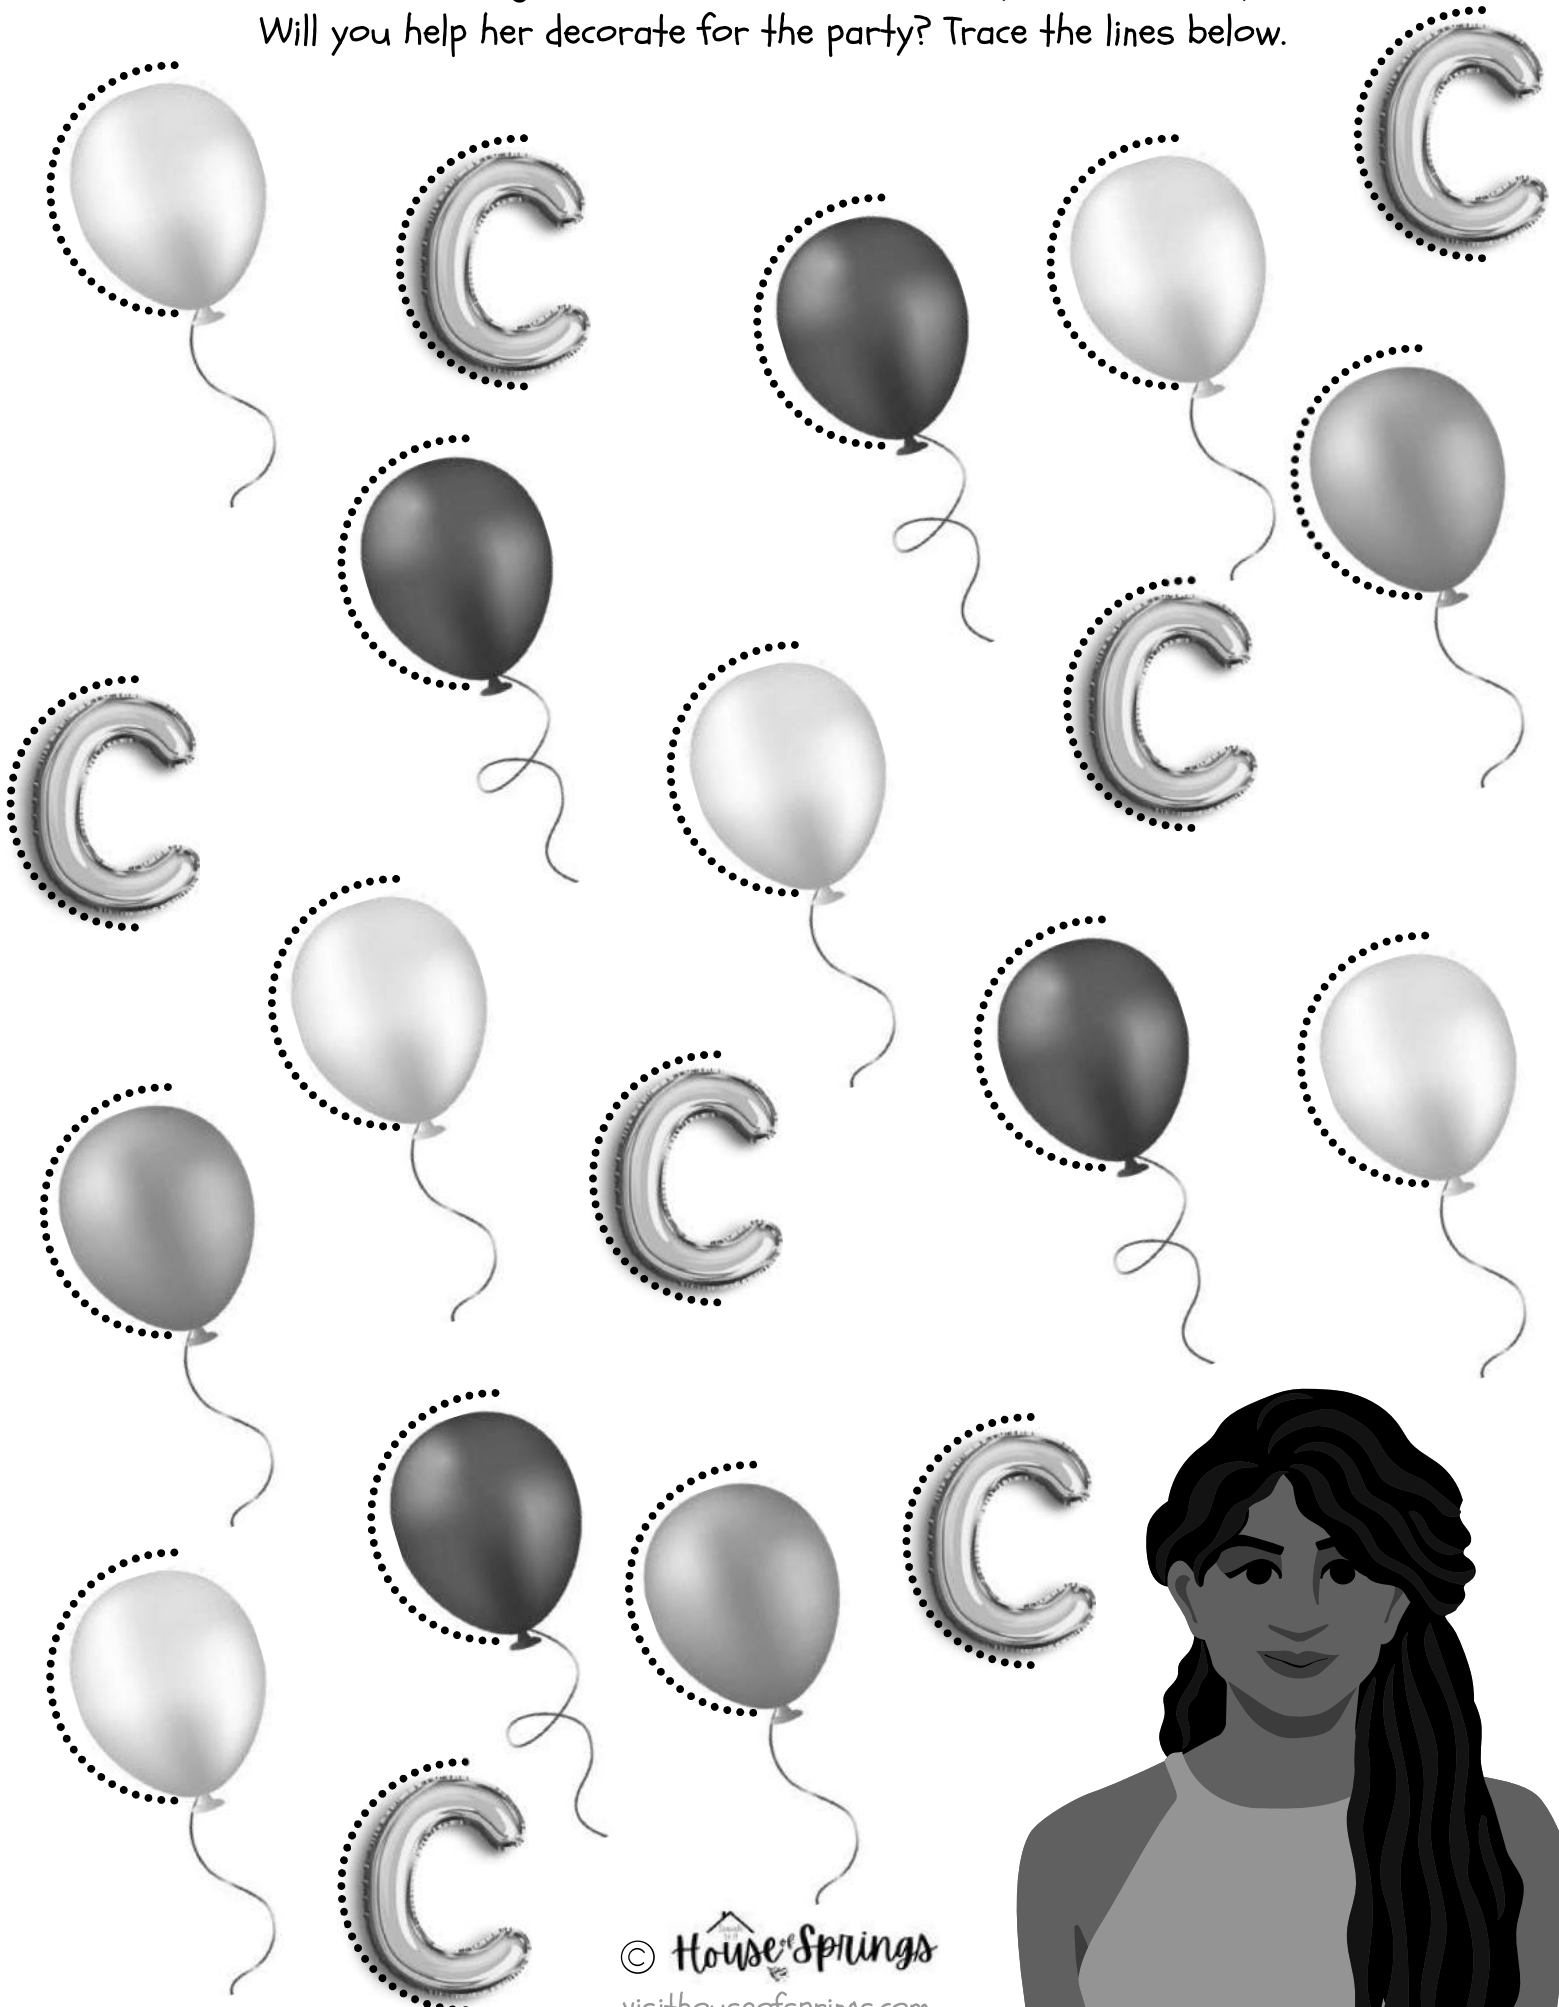

Let's trace this curved line! First, trace each one with your finger. Then trace with your pencil. Start at the top (right) and go down to the bottom (right).

Fantastic work! Keep going!

Mrs. Anderson bought balloons for Christy's surprise birthday party.
Will you help her decorate for the party? Trace the lines below.

Let's draw our shapes! Start at the top dot and draw a curve down to the next dot.
But don't stop! Keep that line going until you get down to the bottom dot!
