

The Prewriting Worksheets Series

The Triangle (Part One)

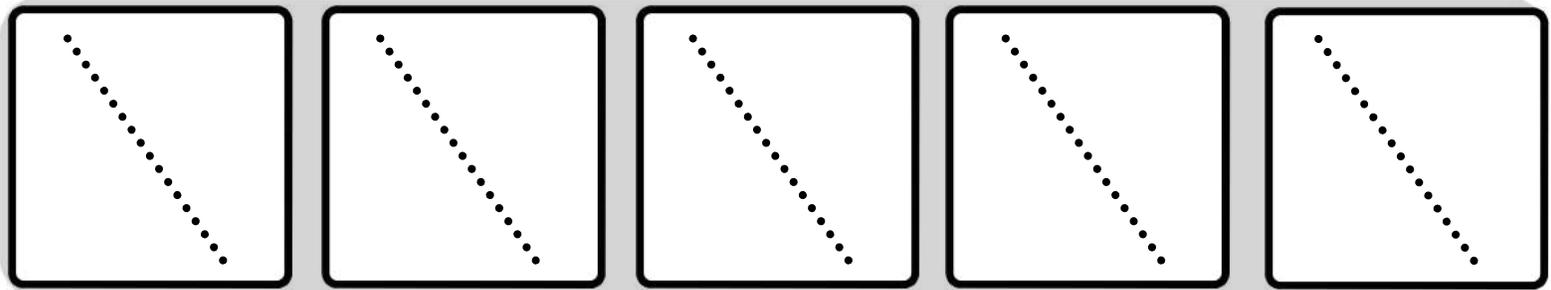

When diagonal lines meet together with a horizontal line, we get the triangle shape! Let's trace it!

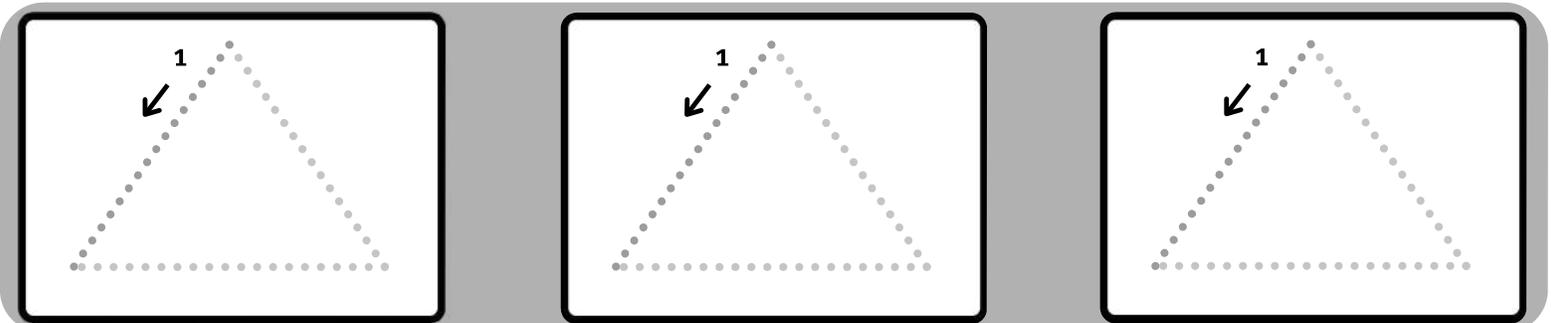

Let's trace these left diagonal lines first! Start at the top and go down to the left.

Next, let's trace our right diagonal lines! Start at the top and go down to the right.

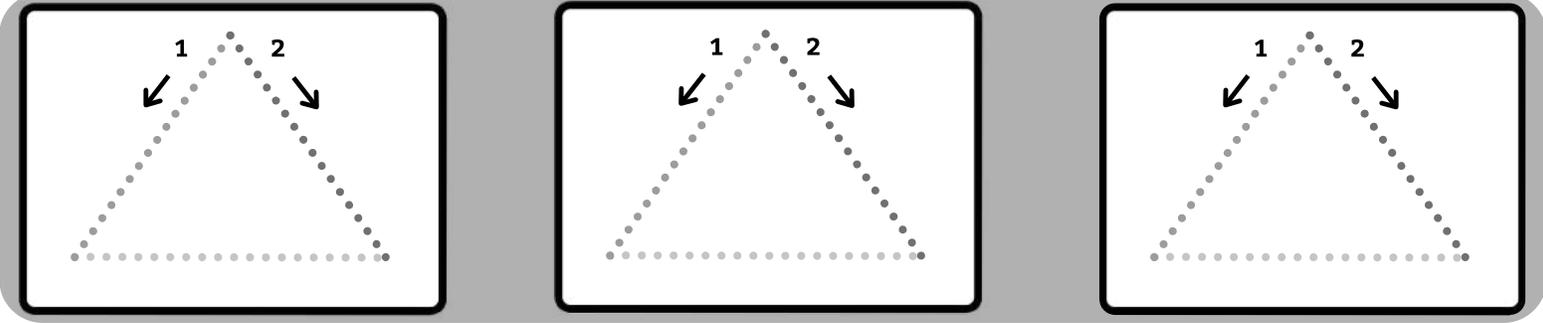

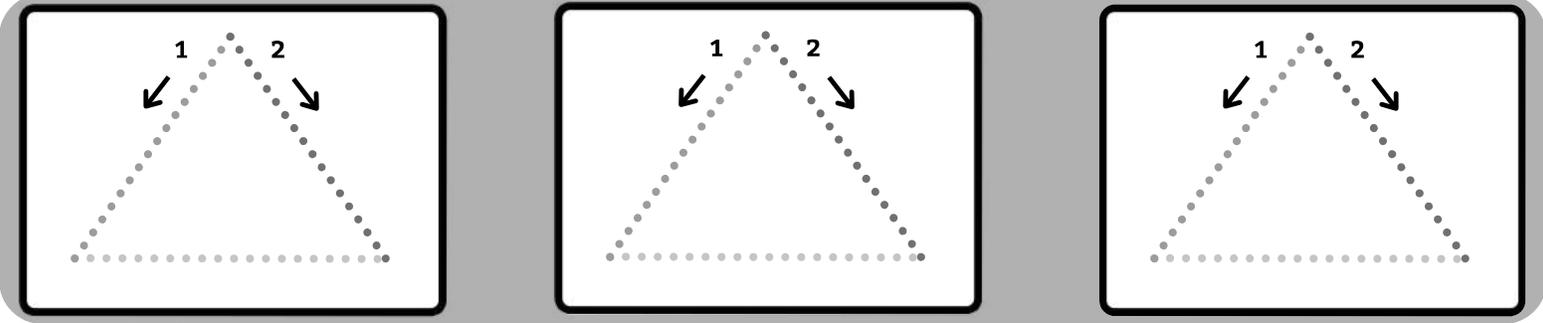

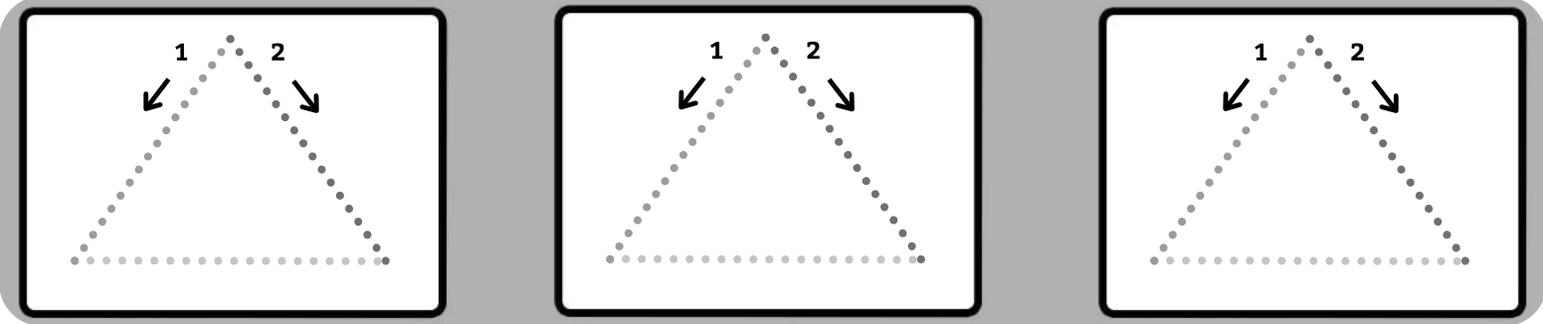

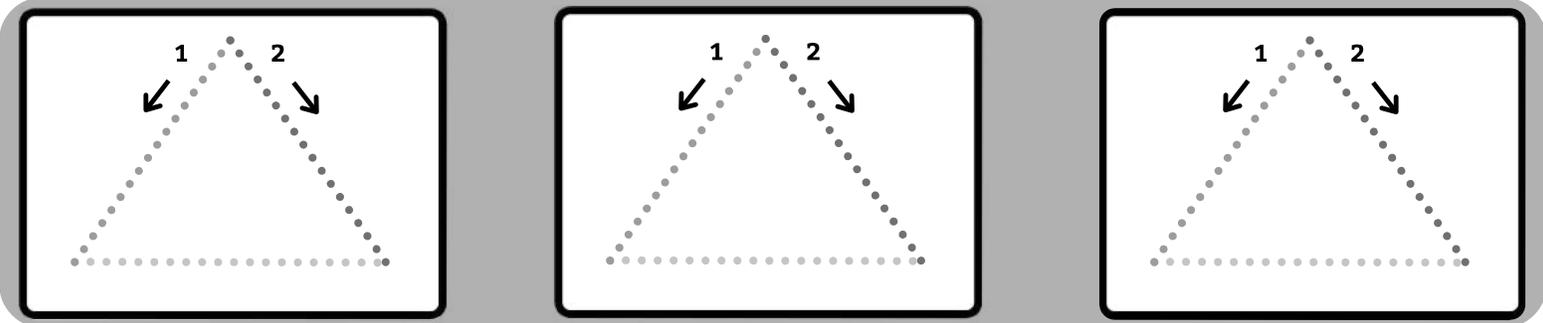

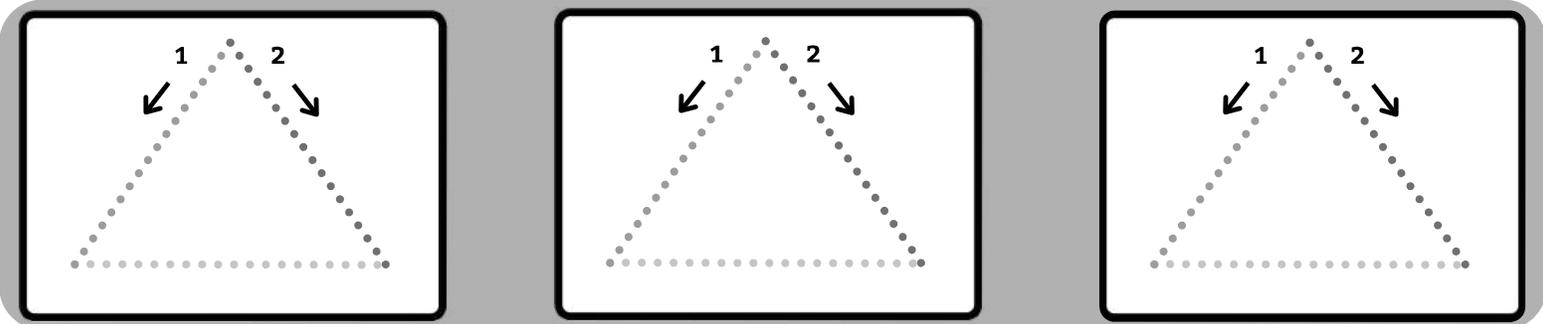

Now let's start making a triangle! Let's start with our left diagonal line!
Start at the top and go down to the left.

Let's add our right diagonal line!

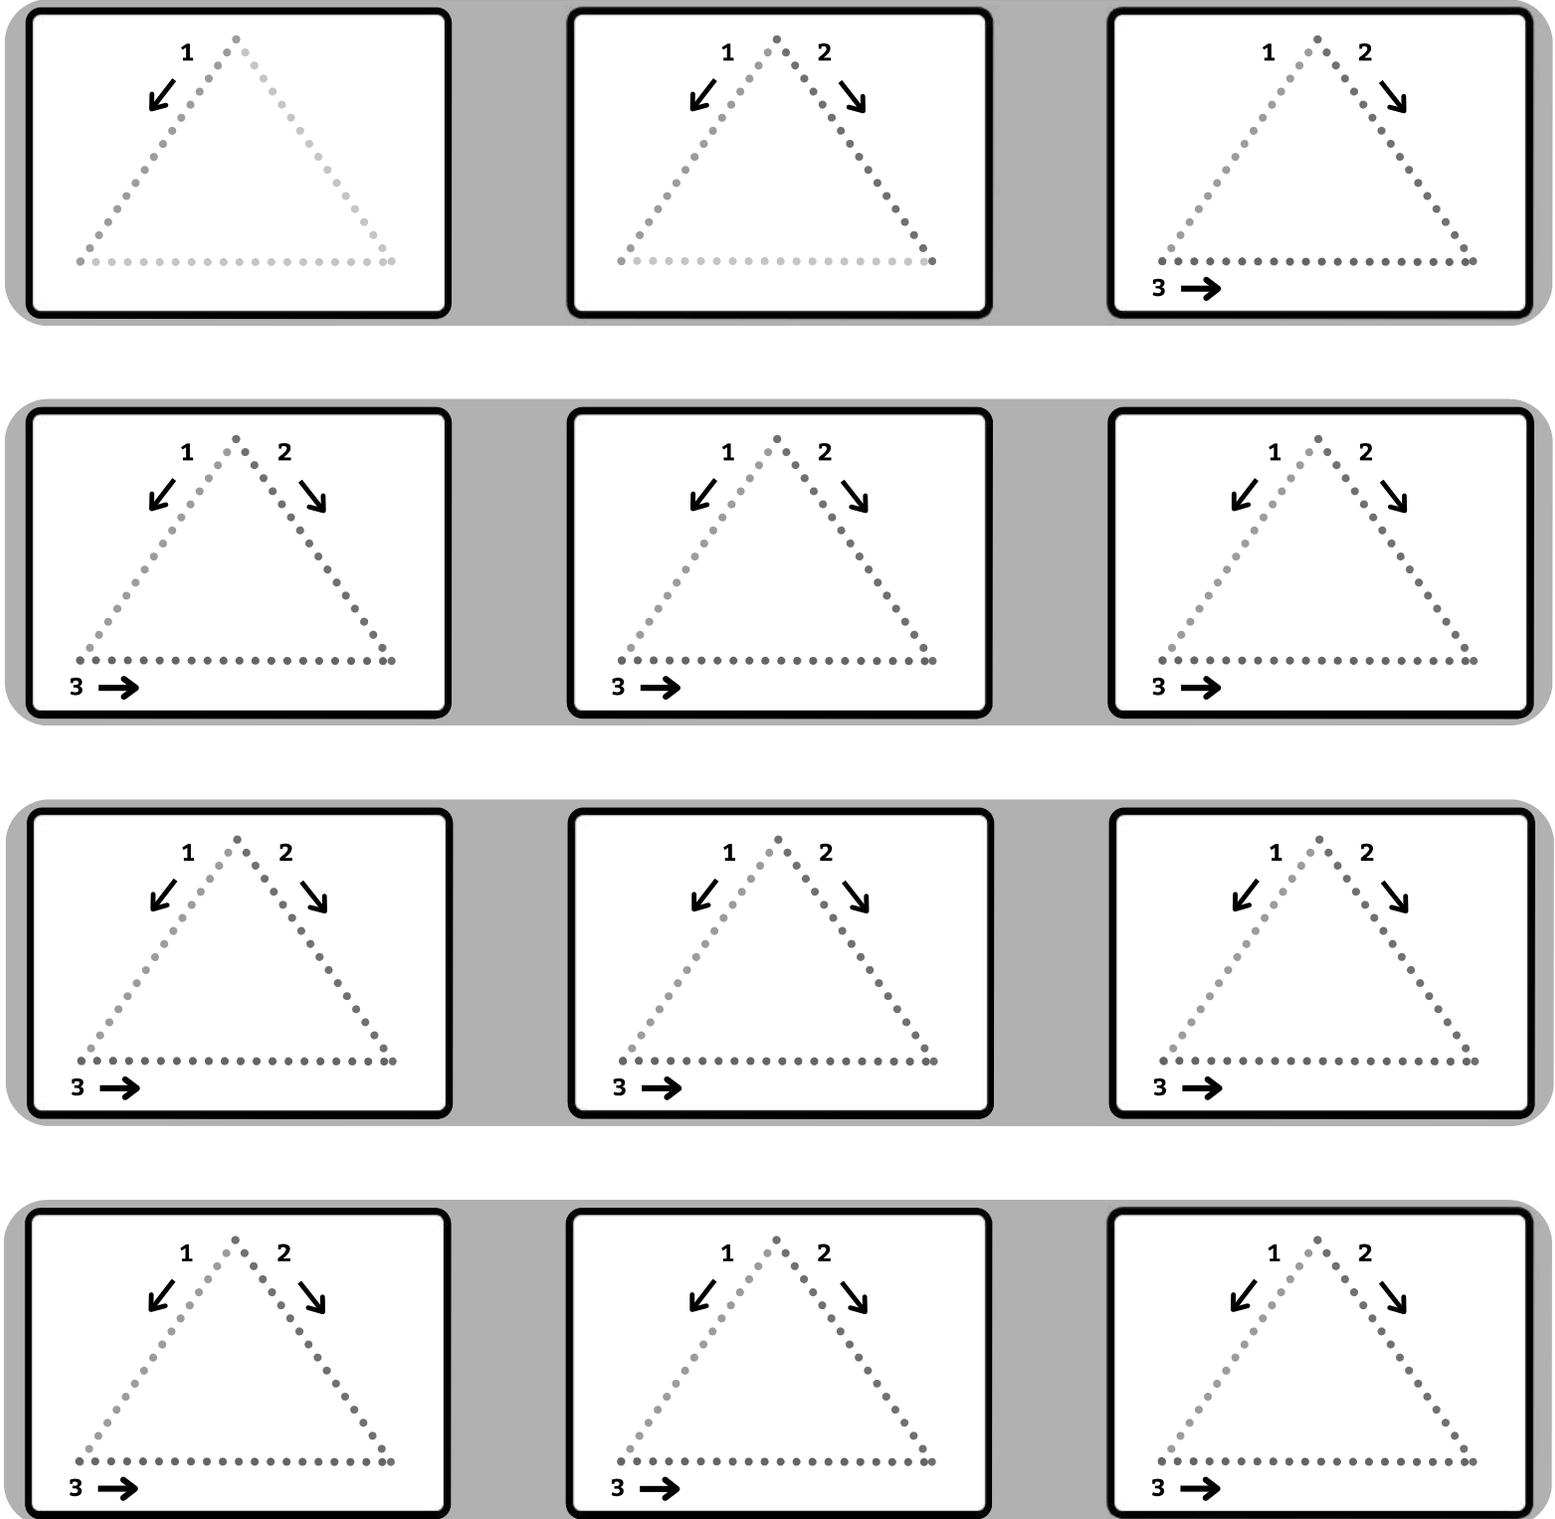

Start at the top and go down to the left. Then start at the top and go down to the right.

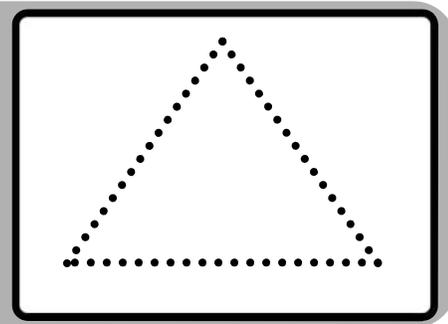

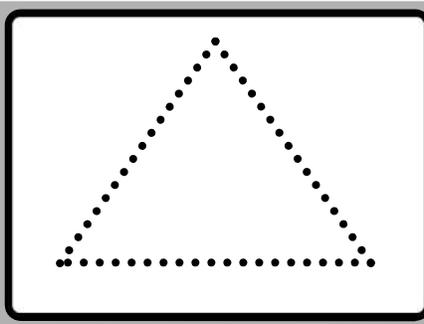

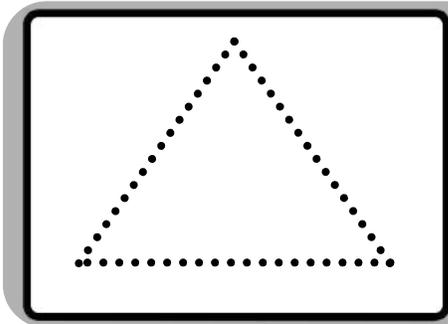

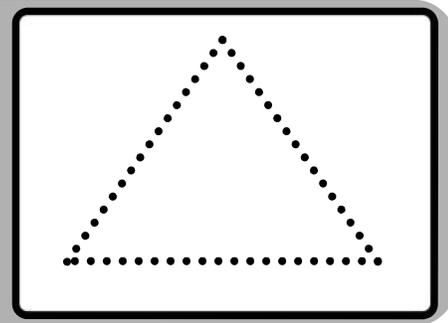

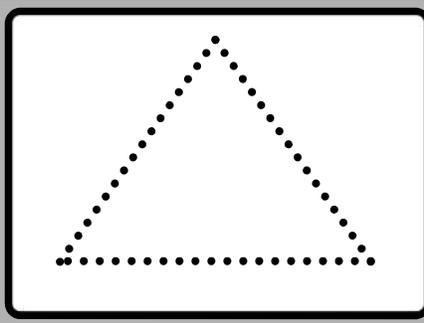

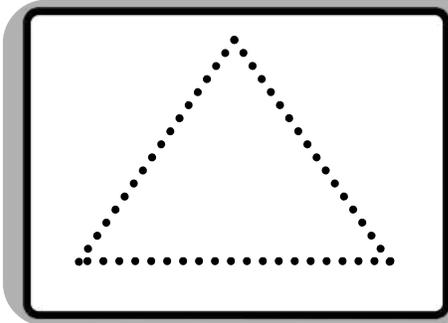

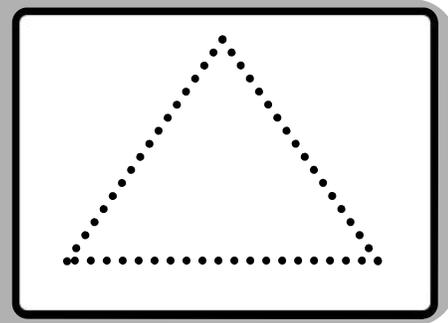

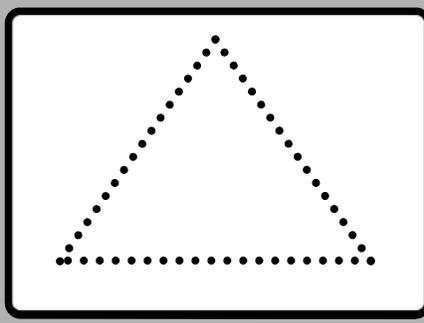

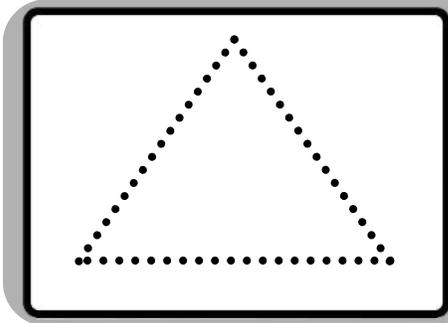

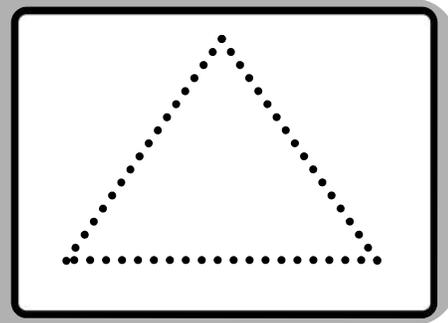

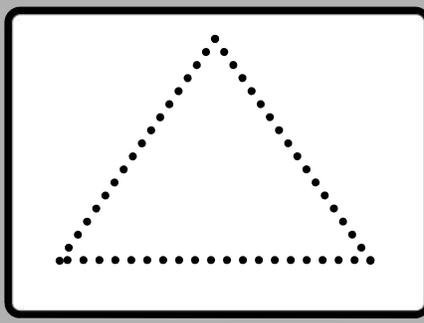

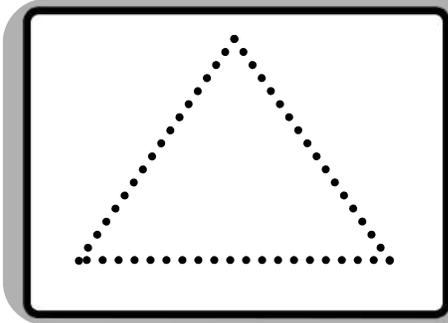

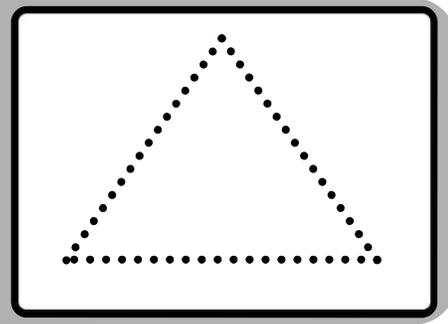

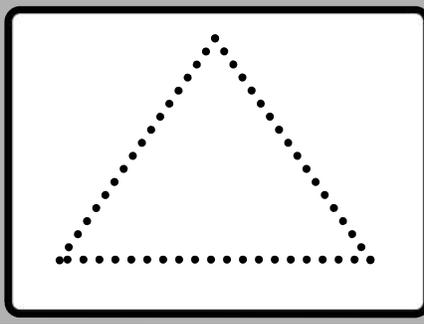

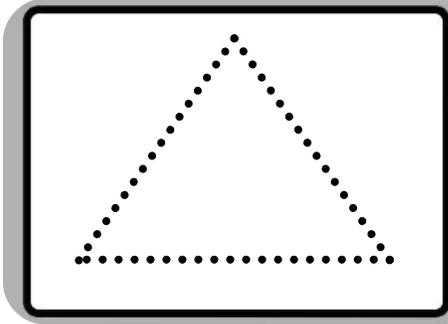

All-right! Now let's make a complete triangle!

First, trace the left diagonal line. Start at the top and go down to the left. Second, trace the right diagonal line. Start at the top and go down to the right. Finally, trace the horizontal line at the bottom of the triangle. Start on the left (next to the yellow line) and go to the right.

And that's it! You've made a triangle!

Great job! Let's trace our triangle with all black lines.

Finish out strong! Finish tracing all the triangles.
