

The Prewriting Worksheets Series

Curved Lines (Part Five)

Our final curved line also moves from side to side, but it goes way down low! It looks like a smile! Will you give me a big smile?

Let's trace this curved line! First, trace each one with your finger. Then trace with your pencil.
Start on the left and trace down, around, and up to the right.

You're doing a wonderful job! Keep tracing!

Now trace our shapes in between the blue lines!

The new queen needs to choose a necklace to wear on her special day.
Will you help the queen choose one? Trace the lines below and then pick one out!

Let's draw our lines! Start at the top left dot and draw a curve down to the next dot.
Don't stop! Keep that curve going around until you get up to the top right dot!
