

# The Prewriting Worksheets Series

## Curved Lines (Part Four)

Our new curve moves from side to side and goes way up high! It looks like a little hill or mountain. Let's get started!

Let's trace this curved line! First, trace each one with your finger. Then trace with your pencil. Start on the left and trace up, around, and down to the right.

Very good! Keep tracing!

Now trace our shapes in between the green lines!

Tommy is on a mission to chase the world's rainbows!  
Will you join him on this quest? Trace the lines below.

Let's draw our lines! Start at the bottom left dot and draw a curve up to the next dot.  
Don't stop! Keep that curve going around until you get down to the bottom right dot!
